

Fattyus P. Hotair

Train Party

You've heard about the Democratic and Republican parties. Here in E&P land there is another major party -- the Train Party. Yes, you hear that right, the TRAIN party. And it is headed up by none other than Fattyus P. Hotair.

Fattyus P. Hotair is again running for Congress. Fattyus is considered the head of the Train Party because he has been able to railroad so many things through Congress. He wants all of you to vote for him and is traveling with the CEO as a part of his campaign. Many of you are not familiar with him. His grandfather, Pinocchio V. Hotaiglione came to this country from Italy and settled in New Jersey where he was involved in many "entrepreneurial" enterprises. Many spoke of him as handling many "shady" deals.

Consequently, he had an early demise at the young age of 35. His son, Fattyus's father, Viggy Hotaiglione learned well from his father and changed his name to Frank Hotair to "blend in with the locals" upon moving to Virginia as one of the early carpetbaggers. This formed the basis for Fattyus and his family members to be involved in many of the business of the area. What many don't know, is that Fattyus is heavily involved in bringing the new BPB Creosote Company in Flat Top. Fattyus's wife's sister is married to the manager of HS Mining Company in Hopkins Spring. In addition to presenting his political platform in Thorny Point, Fattyus is also checking on the new construction at the Easton Oil Company to supply the creosote for the BPB Creosote Company.

Fattyus is looking for your vote because he has brought prosperity and jobs to the area. He got the indoor bathroom put in the Whitehall courthouse. He got the gas line run to the courthouse for the lights [where he has his main office]. His slogan is VOTE FOR HOTAIR IS FAIR!!! Take these banners and buttons and give them to your family, your friends and your neighbors. Tell them that Fattyus will fatten your pocket and that it is no hot air to vote for Hotair.
